ABOUT US

Cito Infotech Pvt Ltd is one of the leading System Integrators providing turnkey solutions in the field of Information Technology. Our highest priority is "Customer focus". Our aim is to maximize customer satisfaction by approaching things from our customer's perspective and anticipating their needs. We have talented professionals with over 18 years' Experience in designing and delivering IT infrastructure solutions and services in complex IT environments. We work along with our customers to design comprehensive solutions, procure required products, implement, support, and manage the entire solution, leaving the customer to focus on their core business.

Cito believes that business is built on relationships and not just on delivery of a product or service at a cost-effective price.

Satisfied Clients

Specialized in Data Centre Infrastructure Solutions & Services which includes Servers, Storage Arrays and Storage Network infrastructure, Data and Network cabinets, High-Availability systems, OpenVMS operating system, Windows Server systems including migration planning and execution, VMware Virtualization solutions, Hyper-V Virtualization Solutions, Backup and Replication Solutions, Disaster Recovery & Business Continuity Services.

Virtual infrastructure Solutions: Virtual Desktop Infrastructure (VDI) a variation on the client/server computing model. It involves hosting a desktop operating system within a virtual machine (VM) that runs on a centralized server. VDI is a variation on the client/server computing model. The centralized server can be remotely hosted and accessed on the internet.

Networking Solutions: We are equipped with the ability to design, implement and manage End to End solution & Networking including Wi-Fi Solutions (LAN, WAN & CAN). An enterprise's IT Network is critical to the smooth operations and business success of the organization. We provide structured connectivity, Switching, Routing and Security solutions to customer who demand the highest levels of quality reliability and security.

OUR SERVICES

We have experience in implementing the projects at Private, Corporate, Public, Defense segments, R&D Organizations and reputed Educational Institutions for end to end IT Solutions.

Security Solutions: There are innumerable public, private, social and internal networks that an enterprise is part of. This automatically exposes the company to a whole lot of security risks and makes the business vulnerable to disruption. A good security solution should not only help companies detect any gaps in the vulnerability of their systems but also plug it effectively. We offer services for deploying security solutions from theft to threat after a thorough assessment of the organization's vulnerability quotient. We can deploy solutions from the endpoint to the gateway level.

Cloud Services: Organizations worldwide are experiencing a paradigm shift in the way IT is being deployed and managed. We offer solutions from traditional IT architectures, to agile and responsive 'hybrid IT' models that involve a diverse mix of hosted applications, public cloud and private cloud infrastructure. We also offer services like cloud, hosting, Colocation, IM Services, Security, SD-WAN.
